📄 SUMMARY

Frontend focused Full Stack Engineer with 3+ years of experience building and scaling high performance web applications using React.js, Next.js, TypeScript, and Node.js. Specialized in real time systems, WebRTC, WebSockets, streaming platforms, and scalable frontend architecture.

Experienced in leading projects from scratch including architecture design, deployment workflows, performance optimization, API integrations, and production debugging. Worked across gaming, healthcare, and enterprise platforms with hands on experience in interactive systems and AI assisted development workflows using tools like Cursor AI and ChatGPT.

🧠 SKILLS

Frontend Engineering: React.js | Next.js | TypeScript | JavaScript (ES6+) | Redux Toolkit | Context API | Tailwind CSS | HTML5/CSS3 | Responsive Design | Component Architecture | Frontend System Design | Performance Optimization | SSR / CSR / ISR | API Integration | Authentication & Authorization

Backend & APIs: Node.js | Express.js | REST APIs | Backend Architecture Basics | Authentication Flow Design | API Design | Strapi CMS | MongoDB | MySQL

Real-Time & Interactive Systems: WebRTC | WebSockets | Socket.io | Live Streaming | Wowza | Real-Time Communication Systems | Browser-Based Rendering | Unreal Pixel Streaming | Low-Latency UI Systems

Dev Tools & Deployment: GitHub | Bitbucket | Jira | Vercel | Deployment Workflows | Debugging & Production Monitoring

AI-Assisted Engineering: Cursor AI | ChatGPT | AI-Assisted Debugging | AI-Driven Development Workflows | Productivity Automation

Core Engineering Concepts: Data Structures & Algorithms | Scalability | State Management | Reusable Architecture | System Optimization

🎓 EDUCATION

Dr. A. P. J. Abdul Kalam Technical University, Lucknow , MCA
10/2023 – 06/2025 | Lucknow, India

Allahabad State University, Bachelors's in Computer Application
07/2019 – 09/2022 | Prayagraj

💼 PROFESSIONAL EXPERIENCE

Dr. Frontend Developer, GOC Productions *🔗*
05/2025 – Present | Remote (Riga, Latvia)

- Led the frontend architecture and development of a large scale real time gaming platform built with Next.js and TypeScript, supporting low latency interactions for 1K+ concurrent users.
- Architected scalable frontend systems from scratch including reusable component libraries, state management patterns, API handling layers, and real time communication architecture.
- Designed and optimized real time communication workflows using WebRTC and WebSockets for live chat, voice communication, multiplayer synchronization, and live event updates.
- Integrated browser based streaming and rendering systems using Unreal Pixel Streaming to deliver high performance interactive gaming experiences directly in the browser.
- Improved application rendering performance and reduced unnecessary re renders through component optimization, memoization strategies, and efficient frontend state handling.
- Managed deployment workflows, production debugging, release cycles, environment configurations, and live issue monitoring for production systems.
- Collaborated closely with backend and product teams to define scalable API integration patterns and real-time data synchronization strategies.
- Used AI assisted engineering tools including Cursor AI and ChatGPT to accelerate debugging, code optimization, development workflows, and productivity.

Full Stack Developer, NotHuman.AI *🔗*
10/2024 – 05/2025 | Remote, India

- Led frontend development and architecture across multiple production grade platforms including healthcare, analytics, and enterprise applications.
- Designed scalable UI systems with reusable architecture patterns, dynamic rendering systems, advanced search capabilities, and optimized data driven interfaces.
- Built responsive and performance focused applications using React.js, Next.js, and TypeScript with strong emphasis on maintainability and scalability.

ENGINEERING STRENGTHS

- Frontend Architecture Design
- Real Time Communication Systems
- Scalable UI Engineering
- Performance Optimization
- Reusable Component Architecture
- Production Debugging & Monitoring
- Deployment & Release Management
- API Design & Integration
- AI Assisted Engineering Workflows
- Cross Team Collaboration & Project Ownership

PROJECT HIGHLIGHTS

- **Real Time Gaming Platform** — Architected and scaled an interactive browser based gaming platform with live chat, voice communication, WebRTC integration, multiplayer synchronization, and low latency streaming systems.
- **Healthcare Platform (Vedobhava Ayurveda)** — Built scalable and responsive healthcare interfaces with advanced search systems, API driven architecture, optimized rendering, and reusable frontend modules.
- **Government & Enterprise Platforms** — Developed large scale data management and reporting systems with optimized frontend workflows, dashboard experiences, and responsive architectures.
- **Trading & Analytics Dashboards** — Built real time dashboards with dynamic data visualization, asynchronous rendering, and scalable frontend state management systems.

- Developed API integration layers, optimized asynchronous data handling, and improved frontend rendering efficiency for high volume data workflows.
- Collaborated with cross functional teams to manage project planning, feature delivery, architecture discussions, and production deployments.
- Implemented interactive animations and modern user experiences using GSAP and advanced frontend rendering techniques.
- Contributed to backend integration workflows and overall application architecture across frontend and backend systems.

React.js Developer, *Webexcellies Websolutions Pvt Ltd*

03/2023 – 04/2024 | Remote(India)

- Developed scalable admin and user facing platforms for managing and visualizing large environmental datasets.
- Built advanced filtering, search, and data management systems to improve accessibility and usability across enterprise workflows.
- Improved frontend responsiveness, rendering efficiency, and cross device compatibility for better user experience and performance.
- Worked closely with APIs, asynchronous data flows, and frontend state management to optimize data handling and rendering.
- Contributed to scalable frontend architecture decisions, reusable component systems, and feature enhancement initiatives.

Full Stack Developer, *Codemaya*

01/2022 – 12/2022 | Lucknow

- Contributed to the development and maintenance of multiple web applications across e commerce, supply chain, and enterprise domains.
- Built reusable frontend modules, authentication systems, API integrations, and backend service workflows using React.js and Node.js.
- Worked on scalable UI architecture, responsive interfaces, and optimized rendering strategies to improve development efficiency and application maintainability.
- Assisted in backend logic implementation, database interactions, reporting systems, and business workflow automation features.
- Collaborated in full project lifecycle activities including development, debugging, deployment support, and production issue resolution.
